

AI Skin Intelligence — User Guide

Step-by-Step Guide for Everyday Users, Consultants, Doctors, and Administrators

1. Welcome to AI Skin Intelligence

AI Skin Intelligence is your personal digital skincare companion. It uses advanced artificial intelligence to analyze your skin concerns, understand your daily habits, create a personalized morning and evening routine, check your skincare products for safe ingredients, track your improvement over time, and connect you with clinical skincare experts.

2. Who Can Use This Application?

- **Everyday Users:** Anyone who wants healthy, clear, glowing skin with a simple, tailored daily routine.
- **Skincare Consultants:** Beauty advisors and skincare coaches who guide clients and monitor their routine adherence.
- **Dermatologists & Doctors:** Medical practitioners who diagnose skin conditions and evaluate high-risk clinical cases.
- **System Administrators:** Platform managers who oversee accounts, system health, and announcements.

3. How to Open the Application, Register & Log In

Step 1 — Open the App: Open your web browser (Chrome, Edge, Firefox, or Safari) and visit the application web address.

Step 2 — Create an Account: Click **"Get Started"** or **"Register"** on the homepage. Enter your full name, a valid email address, and a secure password (at least 6 characters with a letter and a number). Select your role (normally **User**).

Step 3 — Log In: If you already have an account, click **"Sign In"**, enter your email and password, and click **"Log In"** to access your personal dashboard.

4. Understanding Your Dashboard & Sidebar Navigation

After logging in, you will see a clear navigation sidebar on the left side of your screen. This sidebar gives you instant access to every feature:

Menu Item	What You Can Do Here
Dashboard	Overview of your skin health score, current daily routine, and quick wellness stats.
Skin Assessment	Upload or take a photo of your face for instant AI skin condition analysis.
Skin Profile	Complete your 28-question questionnaire about skin type, lifestyle, and allergies.
My Routine	View step-by-step Morning (AM), Evening (PM), and Weekly skincare regimens.
Ingredient Search	Look up cosmetic ingredients to check safety ratings, comedogenic risk, and benefits.
Products	Explore curated skincare products matched to your skin profile and concerns.
Daily Checklist	Check off completed morning and evening skincare steps to build healthy habits.
Progress	View charts of your skin improvement over time and compare before/after results.
Reports & Exports	Download professional PDF summary reports and Excel data sheets.
Notifications & Settings	Manage reminders, hydration check-ins, sleep alerts, and email preferences.

Skin Profile & AI Skin Assessment

How to Complete Your Diagnostic Questionnaire and Capture Accurate Facial Scans

1. Completing Your 28-Question Skin Profile

Your Skin Profile is the clinical foundation of your personalized recommendations. It asks 28 simple questions organized into 5 easy sections:

- **1. Basic Skin Attributes:** Your primary skin type (Oily, Dry, Combination, Normal, Sensitive), skin tone, and primary concerns (Acne, Redness, Wrinkles, Dark Spots).
- **2. Environmental & Sun Exposure:** Daily sun exposure hours, sunscreen usage, and climate conditions.
- **3. Lifestyle & Stress:** Average daily water intake, sleep duration, diet habits, and stress levels.
- **4. Sensitivities & Allergies:** Known sensitivities to fragrances, alcohol, essential oils, or retinoids.
- **5. Current Skincare Habits:** How often you cleanse, exfoliate, moisturize, and apply treatments.

Important Notice for New Users:

"If the required skin profile/questionnaire has not been completed, personalized results such as the Skin Health Score and routine may not be available yet." Always complete your profile first so our algorithms have the necessary data to calculate your personalized score and build your customized routine.

2. Taking or Uploading an AI Skin Assessment Photo

Step 1: Click on "Skin Assessment" in the left sidebar.

Step 2: You will see two options: "Upload Image" (select a photo from your phone or computer) or "Use Camera" (take a live selfie).

Step 3 — Best Photo Tips for Accurate Results:

- Use bright, natural, even lighting (face a window or well-lit mirror).
- Remove makeup and cleanse your face so your natural skin texture is visible.
- Keep your face centered, looking straight ahead with a neutral expression.
- Avoid harsh shadows, blurry photos, or heavy camera filters.

Step 4: Click "Analyze Skin". Our deep learning vision engine will scan your photo in under 1 second.

3. Understanding Your Assessment Results

Once the scan completes, your screen displays a comprehensive diagnostic breakdown:

- **Overall Skin Condition Verdict:** A summary of your overall skin barrier state (e.g., 'Mild Acne & Dehydration' or 'Healthy Barrier with Minor Redness').
- **Concern Breakdown & Severity Ratings:** Detailed bars showing severity from 0 (None) to 5 (Severe) across 18 specific categories: Acne, Blackheads, Redness, Dark Circles, Fine Lines, Pores, Uneven Tone, and Dehydration.
- **Targeted Skincare Recommendations:** Specific active ingredients recommended to treat your highest-priority concerns.

Personalized Routines, Ingredients & Products

Mastering Your Daily Skincare Steps, Ingredient Safety, and Curated Products

1. Your Personalized Daily Skincare Routine

Click **"My Routine"** in the sidebar. The application divides your regimen into three intuitive tabs:

- **Morning (AM) Routine:** Designed to protect your skin barrier throughout the day. Typically includes: (1) Gentle Cleanser, (2) Hydrating Toner, (3) Antioxidant Serum (e.g., Vitamin C or Niacinamide), (4) Barrier Moisturizer, and (5) Broad-Spectrum SPF 50+ Sunscreen.
- **Evening (PM) Routine:** Designed to repair, restore, and renew cellular health while you sleep. Typically includes: (1) Cleanser to remove daily pollutants, (2) Treatment Actives (e.g., Salicylic Acid, Hyaluronic Acid, or Retinol), and (3) Nourishing Night Cream.
- **Weekly Treatments:** Specialized periodic care such as gentle chemical exfoliants (1–2 times weekly) or deep hydration masks.

2. Ingredient Intelligence & Safety Engine

Click **"Ingredient Search"** in the sidebar. This tool allows you to search through cosmetic ingredients before buying products. For every ingredient, you can see:

- **Safety Rating & Comedogenic Score (0–5):** Indicates whether an ingredient is likely to clog pores or cause breakouts.
- **Skin Concern Benefits:** Explains exactly which conditions the ingredient treats (e.g., 'Niacinamide calms redness and controls excess oil').
- **Usage Precautions:** Warns you about potential irritations (e.g., 'Avoid combining Retinol with high-strength AHA acids in the same routine').

3. Product Recommendations & Alternatives

Click **"Products"** in the sidebar to view dermatologist-approved skincare products matched to your skin profile:

- **Product Cards:** View high-resolution product images, brand names, product types, and match percentages.
- **View Details:** Click any card to open a full modal showing key ingredients, usage instructions, and skin benefits.
- **View Alternatives:** Click **"Alternatives"** to see comparable budget-friendly or fragrance-free alternative products.

4. Managing Product Replenishment (Product Tracker)

The **Product Tracker** is a special tool available exclusively for everyday users to prevent using expired skincare:

- Navigate to **Settings & Preferences** → scroll down to **"Product Tracker"**.
- Click **"Add Product"** → enter your product name, the date you opened it, and the bottle cycle (e.g., 45 days).
- The app automatically tracks remaining days and alerts you when your product is 85% depleted so you can restock on time.

Skin Health Score, Daily Checklist & Progress

Tracking Daily Adherence, Understanding Scores, and Measuring Long-Term Progress

1. Understanding Your 0–100 Skin Health Score

Your **Skin Health Score** provides a single, objective measurement of your skin condition. Rather than guessing, the system calculates a weighted score from 0 to 100 based on 5 scientific components:

Score Component	Weight	How It Is Measured & Evaluated
1. Skin Condition	35%	Calculated from your AI facial scans and condition severities (Acne, Redness, Texture).
2. Routine Adherence	20%	How consistently you complete your daily AM and PM skincare checklist steps.
3. Lifestyle Habits	20%	Sun exposure protection, sunscreen usage, exercise, and stress levels.
4. Sleep Quality	15%	Average hours of sleep supporting cellular repair and collagen restoration.
5. Hydration Level	10%	Daily water consumption supporting cellular turgor and barrier hydration.

2. Using the Daily Skincare Checklist

Click **"Daily Checklist"** in the sidebar each morning and evening:

- Check Off Steps:** As you perform each skincare step (e.g., 'Apply Cleanser', 'Apply Sunscreen'), tap the circular checkbox.
- Automatic Progress Logging:** Once all morning or evening steps are checked, the app automatically saves your adherence log.
- Building Consistency:** Keeping your adherence above 80% boosts your overall Skin Health Score and accelerates visible results.

3. Monitoring Longitudinal Progress & Before-and-After Comparisons

Click **"Progress"** in the sidebar to see your historical skin improvement journey:

- Time-Range Trend Charts:** Filter your health score and condition trends across **7 Days**, **30 Days**, **3 Months**, **6 Months**, or **All Time**.
- Adherence Statistics:** View your 7-day and 30-day compliance percentages and see your morning vs. evening consistency.
- Before & After Comparison:** Select two historical scan dates from the dropdown menus. The system will automatically compare concern severities side-by-side and calculate exactly how much your skin condition improved (e.g., 'Acne severity decreased by -1.7 points, barrier hydration increased by +12%').

Notifications, Email Preferences & Reports

Managing Notification Alerts, Explicit Email Consent, and Exporting Clinical Reports

1. Notification Bell & Notifications Center

- **Notification Bell:** Located at the top-right corner of every page. Displays a badge count of unread alerts.
- **Notifications Center:** Click **"Notifications"** in the sidebar to browse all alerts. You can filter by category (Routine, Hydration, Progress, Platform Announcements), mark individual alerts as read, or click **"Mark All Read"**.

2. Setting Role-Specific Notification & Email Preferences

Navigate to **Settings & Preferences** in the left navigation. For everyday users, you can customize:

- **Routine Reminders:** Set exact reminder times for your Morning routine (e.g., 08:00 AM) and Evening routine (e.g., 08:00 PM).
- **Hydration Reminders:** Toggle hourly water check-in reminders (every 2, 3, or 4 hours).
- **Sleep Reminders:** Set a nocturnal bedtime reminder (e.g., 10:00 PM) to ensure cellular repair rest.
- **Product Replenishment:** Receive alerts when routine products are near depletion.
- **Quiet Hours:** Set a quiet window (e.g., 10:30 PM to 07:00 AM) where all notifications are muted.
- **Email Notifications & User Consent:** Toggle **"Enable Email Notifications"** ON if you wish to receive important reminders via email. *By default, email delivery is OFF to protect your privacy and will never send emails without your explicit permission.*

3. Generating & Exporting Reports (PDF & Excel)

Click **"Reports & Exports"** in the sidebar to generate comprehensive clinical summaries of your data:

Report Type	What Data Is Included	Supported Formats
Skin Assessment Report	Full breakdown of AI scan, 18 concern severities, skin condition verdict, and primary recommendations.	PDF Export
Routine Report	Complete AM/PM/Weekly routine steps, product ingredients, directions, and precautions.	PDF & Excel Export
Product Recommendations	Curated product matches, active ingredients, categories, and matching rationale.	PDF & Excel Export
Progress Report	Historical health score trend points, adherence metrics, and before/after comparisons.	PDF Export
Skin Health Summary	Consolidated overview combining score components, routine adherence, and lifestyle stats.	PDF Export

How to Download: Select any report tab, review the live on-screen preview, and click the **"Export as PDF"** or **"Export as Excel"** button at the top right of the card.

Practitioner Guide: Consultants & Dermatologists

Workflow Manual for Beauty Consultants and Clinical Dermatologists / Doctors

1. Skincare Consultant Portal

When logged in with the **CONSULTANT** role, the interface adapts specifically for client routine management:

- **Consultant Dashboard:** View total active clients, clients requiring routine adjustments, average client health score, and overall client routine adherence.
- **Client Directory & Profiles:** Browse your client roster, view individual 28-question profile responses, and check reported allergies.
- **Assessment Reviews:** Review pending AI skin assessments submitted by clients and add personalized coach guidance.
- **Routine Management:** Modify or fine-tune recommended client routines based on their progress.
- **Consultant Settings & Preferences:** Receive alerts strictly for client updates, unreviewed assessments, and client routine changes. *(Personal hydration, sleep reminders, and Product Tracker are completely removed for consultants).*

2. Dermatologist & Doctor Portal

When logged in with the **DOCTOR** or **DERMATOLOGIST** role, the portal provides clinical diagnostic tools:

- **Clinical Dashboard:** View active patients, critical high-risk cases (e.g., severe cystic acne or severe skin barrier damage), completed diagnostic evaluations, and overall healing rate statistics.
- **Patient Triage & Condition Reports:** Inspect patients categorized by diagnostic severity. Examine detailed breakdown of 18 clinical concerns and computer vision confidence scores.
- **Treatment Recommendations:** Formulate medical treatment plans, prescribe clinical-grade active ingredients, and attach diagnostic notes.
- **Longitudinal Patient Analytics:** Track patient healing trajectories over 30 to 180 days using historical delta comparisons.
- **Clinical Notification Settings:** Receive alerts strictly for patient triage assignments, critical assessment submissions, and treatment updates. *(Personal consumer reminders and Product Tracker are completely removed).*

3. Role Features Comparison Summary

Feature / Capability	User Role	Consultant Role	Dermatologist / Doctor Role
Personal AI Assessment	Yes (Self scan)	Yes (Client queue review)	Yes (Clinical diagnostic triage)
Daily Checklist & Score	Yes (Personal tracking)	Client aggregate analytics	Patient aggregate analytics
Product Tracker	Yes (Replenishment)	No (Removed from UI)	No (Removed from UI)
Hydration / Sleep Alerts	Yes (Personal alerts)	No (Removed from UI)	No (Removed from UI)
Clinical Reports Export	Yes (Own reports)	Yes (Client reports)	Yes (Medical patient reports)

Admin Portal & Troubleshooting Guide

Platform Administration Operations and Solutions to Common User Questions

1. System Administration Operations (Admin Role)

- **Admin Dashboard:** Overview of total registered users, active patients, doctors, consultants, total AI scans, and system status.
- **User Directory & Role Management:** View all registered platform accounts. Search by name or email, filter by role, and update user roles (e.g., promote a User to Consultant or Doctor) in real time.
- **Platform Analytics & Telemetry:** Track daily active users, registration charts, and checklist/assessment usage rates.
- **System Health Diagnostics:** Real-time probe of PostgreSQL database latency, API status, and table row counts.
- **Targeted Broadcast Announcements:** Send platform announcements to **ALL** users, or target specific roles (e.g., Doctors only).

2. Troubleshooting Common Issues

Issue / Symptom	Probable Cause	Recommended Solution
Cannot Log In	Incorrect email or password typo.	Double-check credentials. Password is case-sensitive. Verify account was registered.
Score Shows 'Not yet available'	28-question profile is incomplete.	Navigate to Skin Profile and submit all 5 sections of the questionnaire.
Routine Not Showing	Profile submitted without assessment.	Click Skin Assessment to upload a facial scan or complete profile submission.
Progress Charts Empty	No historical checklist or scan logs.	Log at least 1 day of daily checklist steps or take a second skin scan over time.
No Email Notifications	Email notifications are disabled by default.	Go to Settings & Preferences and toggle ' Enable Email Notifications ' ON.
Page Shows 'Access Denied' (403)	Page is restricted to another user role.	Doctor and Admin portals require authorized credentials. Switch to your designated role.
Report Download Failed	Popup blocker or slow network.	Allow browser popups/downloads and ensure at least one assessment has been created.

3. Getting Support & Technical Contact

For additional guidance or system issues, please reach out to your designated clinical consultant or the system administrator via the in-app notification center. Keep your application updated to enjoy the latest skin intelligence features!
